OUTLINE

① Typography Features

② Color and Themes

③ Beamer Features

④ Tables and Figures

⑤ Linguistic Examples

⑥ Footnotes and Citations

⑦ Special Frames

⑧ Advanced Features

⑨ Summary

TYPOGRAPHY FEATURES

The presentation uses **Concourse 3** (light theme) or **Concourse 2** (dark theme) as the main sans serif font with several variants:

- SMALL CAPS using
- ALL CAPS using
- Serif text using Equity A with
- SERIF SMALL CAPS using
- Monospace using Triplicate A Code

Mathematical expressions use FiraMath: $E = mc^2$ and $\int_0^\infty e^{-x} dx = 1$

SPECIAL NUMBERING FONTS

The class provides fancy circle numbering fonts from Concourse T3 Index:

- White circles: ⑯ ⑰ ⑱ ⑲ ⑳
- Black circles: ⑯ ⑰ ⑱ ⑲ ⑳

These appear in:

- ① Enumerated lists (like this!)
- ② Table of contents numbering
- ③ Any place you use the `\arabic` or `\circular` commands

COLOR AND THEMES

Light Theme (current):

- Dark grey text on pale grey background
- Concourse 3 font (regular weight)
- Best for well-lit rooms

Dark Theme (dark option):

- Pale grey text on dark grey background
- Concourse 2 font (thinner weight for better contrast)
- Best for darkened presentation rooms

Change the document class option to switch themes!

The class defines several color palettes:

Accent Colors:

- Alert text in MokaRed
- Hyperlinks in SkyBlue
- Burnt Orange accent
- Ithaca Blue accent

Tol Color Scheme: Indigo, Cyan, Teal, Green, Olive, Sand, Rose, Wine, Purple

BEAMER FEATURES

Standard Block

This is a standard block environment with the moloch theme styling and fill option.

Alert Block

This is an alert block using the MokaRed accent color.

Example Block

This is an example block for demonstrations and examples.

Itemized Lists:

- First item with custom spacing
- Second item using parskip package
- Third item with ragged-right alignment

Enumerated Lists:

- ① Lists use fancy circle numbering
- ② From the Concourse T3 Index font
- ③ Providing visual distinction

PROGRESS BARS

Notice the progress bar features:

- Frame title progress bar (top of each frame)
- Section page progress bars
- Thin 1pt line width for subtle effect
- MokaRed accent color

These are configured in the moloch theme setup with custom line widths.

TABLES AND FIGURES

TABLE EXAMPLE

Tables automatically use monospaced uppercase numbers:

Category	Value 1	Value 2	Total
Alpha	123	456	579
Beta	789	234	1023
Gamma	345	678	1023

The `booktabs` package provides professional table formatting.

FIGURE EXAMPLE

Figures use custom caption formatting (empty label by default):

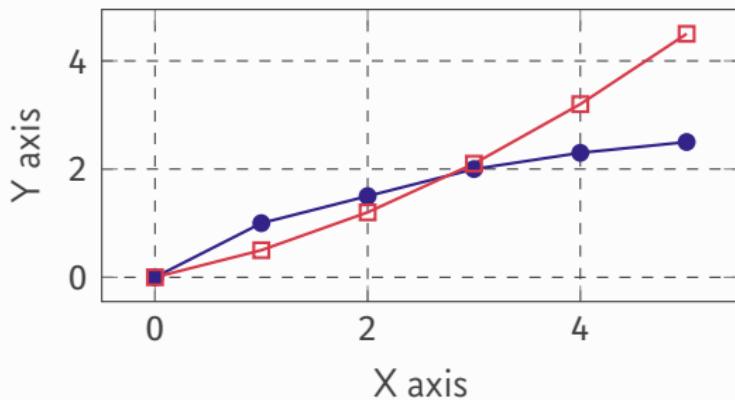

Placeholder demonstrating figure layout

Graphics path is preset to `figures/` directory.

PGFPLOTS INTEGRATION

The class loads pgfplots for data visualization:

LINGUISTIC EXAMPLES

The `linguex` package is loaded with custom formatting:

- ① This is a simple linguistic example.
- ②
 - a. Multiple subexamples
 - b. With proper spacing
 - c. And fancy numbering

Examples can be labelled and referred back: (2-c)

FOOTNOTES AND CITATIONS

Regular footnotes work as expected¹ with custom formatting.

You can also use blind footnotes without numbers:

When `biblatex` is enabled, use `\blfootnote` for citation footnotes without markers.

¹ This is a regular footnote with superscript numbering.
This is a blind footnote created with `\blfootnote`.

When the `biblatex` option is enabled:

- Author-year citation style.
- Maximum 1 cite name, truncated with "et al."
- Custom bibliography formatting
- Footnote-sized citations
- Normal-sized bibliography entries
- URLs, DOIs, and eprints disabled

Use `\cite`, `\textcite`, `\parencite`, etc. for citations.

Example citations: (Smith, 2001) and Müller (2002).

SPECIAL FRAMES

Standout Frame

Use [standout] option for emphasis slides with custom background and large upright text.

Plain Frame

Use [plain] option for frames without header, footer, or frame title.

Useful for full-screen images or special layouts.

ADVANCED FEATURES

The class uses the moloch beamer theme with:

- Progress bar in frame titles
- Section pages with progress bars
- All small caps title formatting
- Regular formatting for title page titles
- Block fill styling
- Custom MokaRed progress color
- 1pt line width for all progress elements

The `appendixnumberbeamer` package is loaded, so you can add backup slides after:

```
\appendix  
\section{Backup Slides}
```

Appendix frames won't affect the frame counter shown to the audience.

SUMMARY

This sample document demonstrates all the unique features of the practical-presentation class.

Thank You!
